

Fig. S1. Area of ALAN influence on nocturnally migrating birds at Tribute in Light, 11-12 September 2015. Bird density close to the installation (white dot) with illumination **a** was noticeably higher than in the surrounding area and without illumination **b**; radial velocity with illumination **c** was noticeably lower than in the surrounding area and without illumination **d**. Each cell shows the mean value for illuminated (**a**, **c**) and dark periods (**b**, **d**).
