

Fig. S11. Relationship of flight call count and normalized amplitude, a calling activity index. Regression of vocal activity on normalized amplitude for flight calls of nocturnally migrating birds in the 6-9 kHz range for 11-12 September 2015. Vocal activity is the number of flight calls counted in each one-minute audio recording. Normalized amplitude is the mean amplitude for the 6-9 kHz frequency band in each one-minute audio recording, normalized to unit.
